- Although having 8ams were dreading, Bonsoon made mornings feel like you can get through the day. He's very upbeat and has jokes. He also makes learning the subject easy. After every discussion, I feel better because I actually feel smart again. Getting the subject is pretty simple when he explains it.
 - Bon-soon is amazing! He gives extra office hours sometimes and really tries to make sure you understand not just how to do a problem, but he makes sure you understand the theory behind it. He is so helpful and always energetic.
 - Bonsoon is my favorite TA. He explains the math well and he is a very funny person. As a TA, he wants all of his students to succeed in the math course. With his help, I was able to brush up and understand concepts that I was struggling with when I leaned in lecture His step-by-step process of a math problem as well as his answers of questions really helped me. He is a genuine person and communicates really well with his students. I feel really engaged in the discussion and I wish I can have him as a TA in my near future.
 - Bonsoon was extremely helpful although his office hours were somewhat limited. The course itself provided the fundamentals of precalculus but I feel as if Professor Sinclair's writing more legible.
 - Bonsoon was very helpful. He helped teach what was lacking in lecture...which was a lot. He was always available for help and even took concern when we didn't ask. He is one of my favorite T.A. this quarter
 - Extend office hours!!
 - Great T.A. overall. Was very effective in answering any questions we had. Made sure everyone understood the material. Really recommend the T.A. to other students.
 - Great energy! Made learning math at 8 am enjoyable
 - Great teacher! He cares about his students and finds ways to incorporate fun ways to learn about a subject. He explains very well and tries his very best to answer questions clearly.
 - I think the TA is very effective in teaching and explaining the material we go over in lecture. He has several methods in solving problems and shows them to us, but essentially teaches using the simplest one -- or the one we're most comfortable with. I like how the TA stresses key points, shows an example then gives us a few problems on it. I wish the discussion was longer because he is helpful in going over the problems on homework but we never finish due to the time.
 - Wonderful TA. Always answers questions in a way that is easy to understand, and very patiently. He is always available, and he always gives great examples of problems in Section.
