2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Bon-Soon has been a wonderful TA. He addressed all our concerns and questions during discussion with utmost efficiency as well as kindness and patience. He managed to make the most of our 50 minutes per week and was extremely helpful.

- Bon-soon was such a lovely TA! His energy and positivity about the subject made Math more tolerable and understandable for me. Bon-soon's sections were valuable to go to not only because he had a wide range of problems prepared for practice but he took time out of section to discuss any questions that students had about homework and you can tell that he really did want his students to succeed in this course and understand the material.

- Bonsoon is by far one of the best TAs I have had at UCLA. He is a very dynamic personality which makes learning the material easier and more fun. I love how passionate he is about teaching, and it really shows by how engaging he is and by how well he is able to help his students thoroughly understand the material. I hope that I have the opportunity to have Bonsoon as a TA again in the future!

- Bonsoon was a wonderful TA. He was always willing to answer homework questions in discussion (such a life saver!) and did a wonderful job at explaining both basic concepts and challenging problems in full. His office hours were just as helpful.

- He is an excellent TA who makes discussion both helpful and entertaining.

- I feel that B. Lin is the best teaching assistant in that he is engaged in the material and causes everyone to get engaged as well. He enters the classroom with enthusiasm and leaves the classroom with a positive note. He reviews material taught in lecture in a simplified manner and goes slightly in-depth than what was taught. During discussion, he goes over any homework question the students may have and explains it step-by-step in a well detailed manner, while teaching what was taught from lecture.

- Lin was extremely helpful in explaining confusing topics discussed in lecture and always went beyond the explanations.

- Mr. Lin/Bonsoon is an amazing TA. He understands the concepts and can easily explain it without confusing the students. He is also very cheerful which made discussion less tedious, since I attended every session. I admire his ability to explain concepts in multiple ways to adjust and accommodate for different types of learning styles of students. The only thing that is a set back is the fact that he will not be a TA for Math 3C for professor Greene next quarter!

- Pretty great TA, I wouldn't say the best I've ever had but certainly on that short-list

- This TA is a very good teacher. Loud, charismatic, funny and explains the material in a very easy to understand way. I attend every second of his office hours. He is wonderful.

- Very good at explaining the concepts and explaining how to do the problems by applying the concepts. Sometimes, get side-tracked or spent too much time on one problem and never finishing on time for the end of class but good that office hours were right after class. However, some students can't make those office hours so they'll have unanswered questions if didn't finish explaining in discussion section.

- very helpful
