2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Best TA I ever had. Very helpful and always willing to help student. Thank you so much for your help.

- Bon Soon is a clearly an experienced teacher and knows a lot about the topic of the course and how it relates to other areas in mathematics. I wish we had discussion twice a week rather than once a week because I would like to learn more!

- Bon Soon was a VERY enthusiastic TA who clearly enjoys teaching the material. He even created a 100 question study guide for the exam (that I think he just decided to make on his own without direction from Dr. Ben Neria). He was always available at office hours and replied to e-mailed questions about problem sets promptly.

- Bonsoon is one of the best TAs I have ever met. He is so helpful both inside and outside of the class. His office hours always last two to three hours. He is patient with every student and explains difficult concepts very clearly. I learnt a lot by going to his discussions and office hours. I really hope he can be my TA for my future math classes.(I may decide to take some classes if he is the TA.)

- I feel like my TA can be a bit overzealous, but he does a very good job of teaching. And his love of the subject is a very good thing, so I wouldn't have it any other way. I don't really know of any criticism that I noticed to help my TA peform better.

- I hate math 135 but bon-soon is the best TA so far I met in UCLA

- Nice guy and a hard working TA

- The teacher assistant for this course was absolutely one of the best teacher assistants I have had at UCLA. He was significantly effective and helpful throughout the course. He was always willing to assist students, and very often he devoted his personal time to help students. He was extremely patient, understanding, and thoughtful of the students. At the same time, his mathematical knowledge was absolutely great. I was definitely satisfied with his performance as a teacher assistant.
  The course was also good in general. I was also satisfied with Professor Omer's performance. The work load of the course was medium.

- This TA was absolutely excellent! His discussion sections were very clear and well thought out and really helped me learn the material .

- This is the best math TA I've ever had here at UCLA. This class is incredible since I feels like I got the best TA and the best professor. Bonsoon is so so so so helpful. He is knowledgeable in math and often provides us with fresh ideas and jokes. I like him. And also I really like the way how the discussion session and lecture integrate. Sometimes, I am unwilling to go to the other TA's discussion session since I feel it's a waste of time. But Bonsoon makes the discussion session so helpful. He is qualified to be a professor I think.

- Very informative and helpful.

- good
