- Bon-Soon Lin is the best TA I have had to date at UCLA. Not only does he teach with enthusiasm, he has a knack for expository mathematics. If I could take a class with him, I would.
 - Bon-Soon is nothing short of an amazing TA. He is unbelievably available outside of the classroom, even for a student like me who has work obligations during unfortunate times. Even spending a few minutes discussing the material with him is immensely helpful. I would want him as my TA for all future classes if possible.
 - Bonsoon was a really good TA. He was extremely available and knowledgeable about the course material. He had the most office hours I had ever seen by far, which was fantastic, because he made sure that everyone who wanted to attend office hours could for sure attend. He helped to expand on class concepts but sometimes just completely went off and taught different stuff. I wish that he would do more review of what we did in class and help re-explain some of those topics, which would have been helpful.
 - He is amazing
 - I enjoyed the discussions sections. I also greatly appreciate the TA's dedication towards his students. For instance, he offered many office hours throughout the course, even having some on sundays.
 - It would be difficult to imagine a better TA! Bon-Soon is very energetic, excited about the material, extremely knowledgeable, and enjoys teaching. He could easily teach the class. He laboriously graded every problem on a ~40-problem problem set -- including pointing out the individual lines in my derivations I went wrong -- when I only expected a few spot gradings. He is also very available outside of class. In fact, he added an additional office hour immediately after our discussion session since it was convenient to us!
 - T.A. often explores material related to but outside of course material (esp. during office hours), which is highly interesting and instructive. In general T.A. offers slightly differing method/notations than professor, but not to the point of being confusing.
